Milliman Mind® Awarded Insurance ERM Asia Pacific Award Actuarial Modelling Solution of the Year

Milliman Mind once again recognized as the premier no-code solution designed by actuaries for actuaries

SEATTLE – March 11, 2026 – Milliman, Inc., a premier global consulting and actuarial firm, is pleased to announce its Milliman Mind® software has won an InsuranceERM Asia Pacific award for Actuarial Modelling Solution of the Year.

Milliman Mind is the first no-code solution designed by actuaries for actuaries, offering clients a portfolio of financial modeling and compliance solutions that save time, automate laborious manual processes, and simplify complex tasks. Whether it is for pricing, reserving, or capital modeling, Milliman Mind's industry-leading approach enables actuaries to boost their productivity while securing results, without having to write a single line of code.

The InsuranceERM judges praised the software's no-code approach "for democratizing modelling and significantly accelerating development speed" and cited one insurance CFO in Asia who commented that Milliman Mind had "significantly improved our product development processes."

"Milliman Mind has once again been recognized for its ability to transform the way actuaries do their work," said Milliman CEO Dermot Corry. "Milliman Mind is used globally because it liberates your team from model management so they can focus on strategic outcomes."

The prestigious annual InsuranceERM Asia Pacific awards honor the insurance industry's best risk management, actuarial, and risk modeling practices, as well as the leading service providers in Asia. This award is the eighth InsuranceERM recognition for Milliman Mind since 2018.
